The Slice Shop – Teacher notes

A text-tool lesson in the same format as the Cheese Moon and Haunted House posters. Shapes and path operations are assumed; new are the four kinds of text in Inkscape: regular text (click), flowed text (drag a box), text on a path and text flowed into a shape – plus text converted to a path for a boolean cut. Every command is in a menu or toolbar.

Minutes	Phase	Watch for
0–2	Open, save with name	Has everyone saved before drawing?
2–6	Background, pizza	Keep it quick – no fine-tuning of pepperoni
6–12	Title	Font and size change only the SELECTED text; colour via Selector + palette; stroke in Fill and Stroke
12–18	Put on Path	Exactly 2 objects (circle + text); size small enough to fit; then circle to no paint
18–23	Text box	Drag, not click; red frame = overflow, drag the ◇ handle
23–28	Flow into Frame	Circle + text selected; centre alignment from the tool controls bar
28–33	Coupon	Spelling first, then Object to Path; text on top; Difference with exactly 2 objects
33–35	Save, export, upload	SVG + PNG

Common mistakes and the quick fix

- A click instead of a drag (or the other way round): a click gives one long line, a drag gives a wrapping box. Edit ▸ Undo and try again.
- The font does not change: nothing was selected. Selector: click the text first, or select the letters with the Text tool.
- Put on Path / Flow into Frame greyed out or nothing happens: not exactly 2 objects selected – read the status bar.
- The text on the circle is cut off: it is longer than the circle. Smaller font size or a bigger circle.
- Red frame around a text box or a flowed text: the text does not fit. Bigger box (◇ handle) or smaller size.
- Difference cuts the wrong way or does nothing: the text was not on top, or was not converted – Path ▸ Object to Path first.
- Missing fonts on school PCs: any Bold/Black sans-serif font is fine. Converted text (Object to Path) looks the same on every computer.

Assessment (10 points)

Element	Points
Background and pizza	1
Title: bold font, size, red fill, dark stroke	2
Text on a path round the pizza, circle invisible	2
Text box with all text visible	1
Text flowed into the circle, centred	2
Cut-out coupon (Object to Path + Difference)	1
SVG + PNG handed in with correct names	1

In the SVG, the ring should be a `textPath`, the badge text a text with `shape-inside` and the coupon a single `path` with holes. Differentiation: weaker students skip the stroke and the coupon label; fast students get the bonus table.
