Haunted House – Teacher notes

Same pattern as the Cheese Moon poster: students apply shapes, fill and stroke, the Node tool and the three path operations on their own, every command in a menu or toolbar. New here: hole-and-glow (Difference + stacking order), Union of more than two objects, an ellipse trimmed by the page (Intersection), and Edit ▸ Duplicate as a step of its own (the fence).

Minutes	Phase	Watch for
0–2	Open, save with name	Has everyone saved before drawing?
2–7	Sky, stars, moon	Moon stroke in Fill and Stroke, Stroke paint tab
7–11	Hill	The ellipse must hang below the page; the rectangle covers its top half
11–16	House	Roof overlaps the walls before Union
16–23	Glowing windows	Longest step: Union of the openings FIRST, then Difference with exactly 2 objects, then Lower
23–28	Ghost	The three circles sit on the hem; Union them before the Difference
28–31	Tree	Object to Path before the Node tool
31–34	Fence	Duplicate puts the copy ON the original – drag it away before the next Duplicate
34–35	Save, export, upload	SVG + PNG

Common mistakes and the quick fix

- Intersection leaves nothing: the rectangle did not overlap the ellipse. Edit ▸ Undo, redraw the rectangle over the top half.
- Difference removes the house instead of cutting the openings: the house was on top. Edit ▸ Undo, select the openings, Object ▸ Raise to Top, repeat.
- Difference is greyed out: not exactly two objects selected – the openings must be ONE object (Union) first. Read the status bar.
- The yellow rectangle covers the house: it is still on top. Object ▸ Lower (not Lower to Bottom – that sends it behind the sky).
- The ghost's hem does not change: the small circles were not overlapping the edge, or they were not united first.
- The Node tool shows round handles instead of corner nodes: the rectangle is not a path yet. Path ▸ Object to Path.
- Path operations do not work on a group: Object ▸ Ungroup first.

Assessment (10 points)

Element	Points
Sky, stars, moon with a stroke (fill and stroke set correctly)	1
Hill with a curved top and flat bottom (Intersection)	1
House as one silhouette (Union)	2
Glowing windows and door (Union + Difference + Lower)	2
Ghost with a wavy hem (Union + Difference)	2
Leaning tree (Node tool)	1
Fence of 5 planks and a rail (Duplicate), SVG + PNG handed in	1

In the SVG the house should be a single `path` with holes, not a rectangle with yellow rectangles on top. Differentiation: weaker students skip the door, the branch and the rail; fast students get the bonus table.
